### **Mission and Description**

The C-130J Hercules Transport Aircraft (C-130J) is a medium-range, tactical airlift aircraft designed primarily for transport of cargo and personnel within a theater of operations. Variants of the C-130J perform other missions including rescue and recovery, air refueling, special operations, fire-fighting and weather reconnaissance.

The C-130J can carry more than 40,000 pounds of cargo (pallets or a varied number of wheeled vehicles) or be configured to carry up to 84 paratroopers. The enhanced cargo handling system reduces crew workload and can be quickly adapted to accommodate any combination of passenger, cargo or aero-medical airlift missions. Two primary methods of aerial delivery are used for equipment delivery: parachutes pulling the load from the aircraft; and the Container Delivery System that uses the force of gravity to pull supplies from the aircraft. The C-130J can also operate from austere landing zones with as little as 3,000 feet of dirt runway.

A stretched version of the C-130J offers aircrews 55 feet of cargo compartment length. The additional 15 feet in length over previous versions of the C-130 translates into 30% more useable volume for increased seating, litters, pallets or airdrop platforms thus providing a significant advantage in the reduction of sorties necessary for mission completion. The C-130J offers a greater value when compared to any other tactical airlifter.

### **Executive Summary**

The C-130J Program Office continued to support warfighter requirements worldwide. Program Office efforts included continued management of all United States Government (USG) C-130J variant aircraft production and initial sparing, several USG specific modification programs, management of twelve FMS cases and an international development program for block upgrades for the C-130J fleet.

Lockheed Martin delivered a total of nineteen aircraft in CY 2015 to USG and FMS customers. Twenty-four USG and five FMS C-130J aircraft are estimated for delivery in CY 2016.

In CY 2015, the C-130J Program Office continued toward awarding a second Multi-Year Procurement (MYP II: 78 aircraft plus options) across FY 2014 through FY 2018 buy years. Due to prolonged MYP II negotiations, FY 2014 and FY 2015 obligations were behind OSD goals for most of the year. MYP II negotiations concluded on October 8, 2015. In November 2015, the C-130J Program Office issued two Undefinitized Contract Actions for the FY 2014 procurement (17 aircraft) and FY 2015 Advance Procurement for FY 2016 buys (28 aircraft). On November 6, 2015, the CAPE provided an updated independent estimate of savings for MYP II. The CAPE estimated the MYP II provided a substantial cost savings of 11.5% over annual year procurements. MYP II contract award occurred on December 30, 2015 following 30-Day Congressional Notification, which began on November 30, 2015.

The Army-led and funded, Extracted Container Delivery System – High Speed (formerly named the High Speed Container Delivery System) expanded the C-130J airdrop performance envelope and reduced the altitude required for airdrops. The Air Force released the initial capability in March 2014 and flight release for operational evaluation at Yuma Proving Grounds in January 2015. Based on the program success, U.S. Army Natick Soldier Systems and Air Mobility Command are continuing airdrop procedure and capability evaluation through FY 2016 for transition of the capability to follow-on airdrop programs and incorporation into operations.

In February 2015, a major fire completely destroyed the production facility of General Electric (GE) Dowty, the manufacturer of the C-130J's propeller blades. A robust effort was undertaken by GE Dowty, Lockheed Martin, Rolls-Royce, and the USG to mitigate the effects this catastrophic event would have on supporting the fielded C-130J fleet and the C-130J production line in Marietta, GA. The USG provided assets to GE Dowty and the C-130J production line to help further mitigate any effect the gap in blade production would have on the delivery of new C-130Js to the USG. To date, GE Dowty has been able to re-establish their propeller blade production capability and have shipped the first production blades to the C-130J production line to facilitate continued delivery of C-130J aircraft to the USG. Based upon projected yield of the production blades from the new facility, full catch-up (to include the payback of borrowed assets from the USG) will occur in September 2017.

International Collaborative Block Upgrade (BU) Programs:

The initial BU 8.1 program incorporates ten new capabilities with emphasis on the Civil Data Link, Automatic Dependent Surveillance Broadcast-Out, and Identification Friend or Foe Transponder Mode-5. The BU 8.1 program increased scope in July 2015 by adding seven high priority capabilities. BU 8.1 common core completion is estimated for August 2016.

There are no significant software-related issues with this program at this time.

#### **Target Price Change Explanation**

The difference between the Initial Contract Price Target and the Current Contract Price Target is due to the test venue change from Edwards Air Force Base to Marietta, GA and unearned award fees for periods 1 through 3. The difference is also due to increases for:

- 1. Block 8.1 compatibility incorporation into Color Multi-Function Display Unit Diminishing Manufacturing Sources replacement hardware;
- 2. Implementation of Air Mobility Command Aircraft Communications Addressing and Reporting System Standard Message Set (SMS) Version 3.2 and Barometric Vertical Navigation;
- 3. Block 8.1 Airline Operational Control SMS addition of crew select messaging On/Off switch and metric conversion; and
- 4. Block 8.1 expanded scope to add seven additional capabilities above the original ten in the Common Core program.

#### **Cost and Schedule Variance Explanations**

The unfavorable net change in the cost variance is due to additional software development and testing.

The unfavorable net change in the schedule variance is due to additional software development and testing.

### **Target Price Change Explanation**

The difference between the Initial Contract Price Target and the Current Contract Price Target is due to the addition of aircraft buys, spares, support equipment, engineering changes, Diminishing Manufacturing Sources effort and other production related efforts.

### **Cost and Schedule Variance Explanations**

Cost and Schedule Variance reporting is not required on this (FFP) contract.

#### **Notes**

This contract is more than 90% complete; therefore, this is the final report for this contract.

#### **Cost and Schedule Variance Explanations**

None

#### **General Contract Variance Explanation**

Cost and schedule variances are not reported for this FPIF contract, because EVM reporting has been waived. A class deviation to exclude Defense Federal Acquisition Regulation Supplement clauses 252.234-7001 and 252.234-7002 was approved by Headquarters Air Force Materiel Command on February 13, 2014.

The above data is current as of February 09, 2016.

### **Operating and Support Cost**

#### **Cost Estimate Details**

Date of Estimate: January 27, 2016

Source of Estimate: POE

Quantity to Sustain: 168

Unit of Measure: Aircraft

Service Life per Unit: 30.00 Years

Fiscal Years in Service: FY 2000 - FY 2057

There have been two C-130J aircraft lost in Afghanistan. A total of two Overseas Contingency Operations (OCO) aircraft were added in the FY 2015 and FY 2017 PBs. Both lost aircraft are included in the procurement total of 169. However, O&S costs are for 168 aircraft, which is based on C-130J's current program office estimate.

### **Sustainment Strategy**

The C-130J ensures continued aircraft availability to the warfighter within the financial constraints defined by the owning commands and the United States Air Force (USAF) by using a Long Term Sustainment contract with Lockheed Martin, a Power-By-The-Hour engine contract with Rolls Royce, and C-130 Legacy common organic resources.

#### **Antecedent Information**

The C-130H1 and C-130H2 are antecedent aircraft. The Air Force Total Ownership Cost (AFTOC) database for the fourth guarter of CY 2015 was used to obtain costs. Costs assume a 30 year life span.

| Annual O&S Costs BY1996 \$M    |                                            |                                                           |  |  |  |

| Curre     | Current Production APB<br>Objective/Threshold |     | Current Estimate | (Antecedent) |
| Base Year | N/A                                           | N/A | 30693.6          | 27388.5      |
| Then Year | N/A                                           | N/A | 54628.0          | N/A          |

There are no O&S cost Objective or Threshold values listed in the APB.

# **Equation to Translate Annual Cost to Total Cost**

The unitized cost multiplied by the quantity (168) multiplied by the service life (30 yrs) equals the Total O&S cost in BY\$.

| O&S Cost Variance                            |                |                                                                                                                                                                         |  |  |

#### **Disposal Estimate Details**

Date of Estimate: January 27, 2016

Source of Estimate: POI

Disposal/Demilitarization Total Cost (BY 1996 \$M): Total costs for disposal of all Aircraft are 6.5

The disposal cost estimate will be refined as the System Disposal Plan Annex to the Life Cycle Sustainment Plan is developed.
